19- FAIR VALUES

Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Accordingly, differences may arise between the carrying amounts and fair value estimates under the assumption that the Company is a going concern with no intention or need to liquidate or make transactions under unfavorable terms.

Assets and liabilities measured at fair value are categorized in the statement of financial position using a three-level fair value hierarchy. This classification is based on the lowest level of significant input used in the fair value measurement, as follows:

- Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).
- Level 3: Inputs for assets or liabilities that are not based on observable market data (unobservable inputs).
